SUMMARY

As a passionate software developer with a focus on frontend development, I am Mohammed Aman Nawaz. With a strong expertise in ReactJS, Next.js, and various JavaScript libraries, I thrive on building innovative and visually stunning projects that showcase my skills to the world. My enthusiasm for technology drives me to continuously seek out new challenges and automate tasks to streamline workflows. Alongside my technical prowess, I possess a solid understanding of Git and GitHub, enabling efficient collaboration and version control. I am excited to contribute my knowledge and creativity to further enhance the field of software development.

EDUCATION

B.E in Mechanical Engineering

M.J.C.E.T , Banjara hills , Hyderabad
Sri Chaitanya College , Mehdiapatnam
Relevant coursework: MPC stream.

Graduating July 2022

8.3 GPA

TECHNICAL SKILLS

Design: Canva, Figma, Photoshop, Drrible.

Web Development: HTML5, CSS3, Javascript ES 6, Reactjs, Nextjs, Js libraries, Git, GitHub, RestAPI, MySQL, React native/hooks, UI/UX.

Programming: C, Python , Java

Certifications: Full Stack Web development 2022 (Udemy) – December 2021

EXPERIENCE

Imagine IT, Hitech City phase-3, Hyderabad: Junior Frontend Development Intern

Jan 2023 – Present

- Managing UI/UX using HTML, CSS, JavaScript, and React.Js.
- Creating reusable components to optimize code and speed of web app and regress unit testing before sending for Q/A.

Freelancer, Remote: Web Developer

May 2021 – Present

- Worked with the Developer team and understand how to build UI/UX and designed graphics and UX using Html, CSS and React.JS, and Illustrator.
- Understanding using proper colors and fonts and started with 3D designing using Figma.

ACADEMIC PROJECTS

ENGANT | WordPress + Front-end Based Project / Dev Community

Summer 2021

Collaborated in a team of three to design model of custom responsive web project to give valuable insights on programming.

- Developed team schedule, including quality measurement for each major milestone (Personal Project)
- Developed a responsive Ui/Ux design with a great features to help students and professionals to start their career in programming.

REACT MOVIE APP | React.Js Project

Spring 2022

Build a React based movie app using react.js and MovieAPI

URL SHORTENING API PAGE | React.Js API Based Project

Summer 2023

Build a React based url shortening single page app using react.js and RapidApi

OTHER WORK EXPERIENCE

Computer Society of India (CSI), : Technical Head(6 hours/week)

Aug 2019 – May 2021

- Implemented programming concepts to build some minor and major projects to take part in various Hackathons

Optimum Club, : Technical Associate, Mechanical Department(6-8 hours/week)

Aug 2019 – Dec 2021

- Worked and implemented the concept of Arduin Uno with coding to build some amazing robotics projects.
